The Poem makes the superior Word of God come alive and move souls to repentance, conversion, and peace. "The time has come to appreciate this great mystical work. The positive spiritual discernment of St. Teresa of Calcutta and other recently declared 'Blesseds' of the Church testify to its inspiring and authentic contents. The sublime Mariological theme of Mary as the 'Co-redemptrix' with and under Jesus, the divine Redeemer, accurately embodies the best and richest Mariology of the last millennium. Rather than a threat to Scripture and the Church, its contemplation and study should lead to a deeper understanding of the beauty and richness of the Church's message of salvation. The positive reception of this work should be encouraged, and those who may have reservations should be free to express them in a spirit of openness and genuine dialogue. The more people who come to appreciate and understand this great work, the more it will contribute to the spiritual enrichment of the Church and the souls of those who take time to read and reflect on its message."

come for the Poem of the Man-God to be universally appreciated as the contemporary mystical classic that it is. Thank you, Fr. Pillari and Stephen Austin for this outstanding articulation and defense of the pearls of The Poem for today.” -- Dr. Mark Miravalle St. John Paul II Chair of Mariology Franciscan University of Steubenville President, International Marian Association

Satan is always at work breeding sadness and anxiety while providing obstacles that prevent souls from making spiritual progress. In this concise yet powerful book, author Dan Burke presents the venerable, time-tested wisdom of Catholic mystics to help you understand the influence of the Enemy on your mind and heart, and the tactics you need to combat him. With St. Ignatius as his guide, Burke presents here an indispensable, authoritative manual for engaging in daily battle with the Adversary—combat that is both inevitable and winnable. Burke will help you recognize the ebbs and flows of consolation and desolation, and distinguish between the voices of God and of Satan. Best of all, you’ll come to see the spiritual life not as a science to be learned, but as an intuitive art to be practiced as you move with increasing success from habitual sin to sanctity. The battle for our souls is unavoidable. The saints won theirs by learning how to be spiritual warriors and by recognizing that we become stronger through battle and grow weaker from avoidance. With this book as your guide, you’ll grow in strength and contentment as you learn: -How to take captive every negative thought and make it obedient to Christ -St. Ignatius’s revelations exposing how the Devil seeks to influence us -The Paradigm of Ascent and the Five Steps to Sanctity -The three ways you can discern “Good Spirits” from “Bad Spirits” -The three principal causes of desolation— and what you must do when it afflicts your soul -Proven methods for moving away from sin and toward self-giving love of God and neighbor.

Civilizations of the Ancient World offers a uniquely visual approach to exploring the cultures of the key civilizations of ancient times. By combining historic engravings with a modern commentary that is at once authoritative and accessible, it creates both a visual celebration and invaluable reference for all students of early history. The main section of the book focuses on ancient Egypt, Mesopotamia, Rome and Greece, offering a detailed exposition of each in turn through thematic spreads depicting many aspects of their cultures. Government, society, war, religion, work, leisure, shelter, food, costume and daily life are all revealed in vivid detail through carefully designed compositions of both coloured and monotone engravings. A second section features timelines, maps and overviews of the other key civilizations that were flourishing throughout the world at that time. Thus the reader is offered both a close-up view of the four major peoples who hold an endless fascination for modern readers, plus a broader panorama of the global cultures that shaped the ancient world.

Over the last two decades the development, evaluation and use of MFM systems has been a major focus for the Oil & Gas industry worldwide. Since the early 1990’s, when the first commercial meters started to appear, there have been around 2,000 field applications of MFM for field allocation, production optimisation and well testing. So far, many alternative metering systems have been developed, but none of them can be referred to as generally applicable or universally accurate. Both established and novel technologies suitable to meet the as yet unsolved problems. The book provides a critical and independent review of the current status and future trends of technology is discussed. The book suggests where the research to develop the next generation of MFM devices will be focused in order to meet the as yet unsolved problems. The book provides a critical and independent review of the current status and future trends of MFM, supported by the authors’ strong background on multiphase flow and by practical examples. These are based on the authors’ direct experience on MFM, gained over many years of research in connection with both operators and service companies. As there are currently no books on the subject of Multiphase Flow Metering for the Oil & Gas industry, this book will fill in the gap and provide a theoretical and practical reference for professionals, academics, and students. * Written by leading scholars and industry experts of international standing * Includes strong coverage of the theoretical background, yet also provides practical examples and current

On 6 December 1959, Prime Minister Jawaharlal Nehru went to Dhanbad district in Jharkhand to inaugurate the Panchet Dam across the Damodar river. A fifteen-year-old girl, Budhini, chosen by the Damodar Valley Corporation welcomed him with a garland and placed a tikka on his forehead. When these ceremonial gestures were interpreted as an act of matrimony, the fifteen-year-old was ostracized by her village and let go from her job as a construction worker, citing violation of Santal traditions. Budhini was outlawed for ‘marrying outside her community’. Budhini Mejhan’s is the tale of an uprooted life, told here through the contemporary lens of Rupi Murmu, a young journalist distantly related to her and determined to excavate her story. In this reimagined history, Sarah Joseph evokes Budhini with vigour, authority and panache, conjuring up a robust and endearing feminine character and reminding us of the lives and stories that should never be forgotten. Translated by her daughter, Sangeetha Sreenivasan, a fiercely individualistic novelist herself, Sarah Joseph’s Budhini powerfully invokes the wider bio-politics of our relentless modernization and the dangers of being indifferent to ecological realities.

A classic work of Christian faith, “Life of Christ” is considered a Classic work which has been hailed as the most eloquent of Fulton J. Sheen’s many books. This book explores the foretelling of Christ’s birth, his life, temptations, death, and resurrection. But while Sheen himself was a scholar and academic, his recounting is both readable and accessible to the layperson and is unique in its readability. Broken into five parts, the book explores the early life of Christ, his temptations, the beatitudes, his public life and Passion, and his death and resurrection. Sheen explains the meaning of Christ’s words, as well as the significance of the trials and temptations he overcame. Through careful scholarship, he connects the events of Christ’s life, showing how even the humble location of his birth on Earth shared an important lesson: “Divinity is always where we least expect to find it.” For those seeking to better understand the

A cranky, atheistic philosophy professor loves to shred the faith of incoming freshmen. He is chosen by a group of scientists to create a philosophy for a computer-generated world exactly like ours. Much to his frustration every model he introduces—from Darwinism, to Existentialism, to Relativism, to Buddhism—fails. The only way to preserve the computer world is to introduce laws from outside their system through a Law Giver. Of course this goes against everything he's ever believed, and he hates it. But even that doesn't completely work because the citizens of that world become legalists and completely miss the spirit behind the Law. The only way to save them is to create a computer character like himself to personally live and explain it. He does. So now there are two of him—the one in our world and the one in the computer world. Unfortunately a rival has introduced a virus into the computer world. Things grow worse until our computer-world professor sees the only way to save his world is to personally absorb the virus and the penalty for breaking the Law. Of course, it's clear to all, including our real-world professor, that this act of selfless love has become a reenactment of the Gospel. It is the only possible choice to save their computer world and, as he finally understands, our own.

Much of modern economic theory is based on a rather unflattering view of human nature, one that is essentially selfish and materialistic. Not surprisingly, this incomplete version of human anthropology makes for some rather incomplete economic theory, argues Edward Hadas in Human Goods & Economic Evils. Instead of simply being utility maximizers, Hadas argues human beings also seek to maximize morality in their everyday economic lives. For Hadas, economic man is moral man, who always strives for the good according to his nature. While the weakness of human nature ensures that the good is never fully achieved, economic activity is nevertheless best understood as part of the great moral enterprise of humanity. Human Goods & Economic Evils does not claim that the basic economic activities of laboring and consuming are the most important things in life, but they are literally vital, and as such deserve to be studied and understood through a more morally sympathetic view of human nature. With this in mind, Human Goods & Economic Evils provides both lay readers and policymakers the intellectual tools necessary to judge what is right and what is wrong about the modern economy, and returns the study of economics to its proper, more humanistic sphere.

On 23 April 1943, Good Friday, Maria Valtorta reported hearing the voice of Jesus. From then until 1951 she produced over 15,000 handwritten pages in 122 notebooks, mostly detailing the life of Jesus as an extension of the gospels. Her handwritten notebooks containing close to 700 reputed episodes in the life of Jesus were typed on separate pages by her priest and reassembled, given that they had no temporal order, and became the basis of her 5,000-page book The Poem of the Man God.
