Integrating Educational Technology Into Teaching Chapter 1

Teaching and Learning with Technology This fourth volume in the Current Perspectives on School/University/Community Research series brings together the perspectives of authors who are deeply committed to the integration of digital technology with teaching and learning. Authors were invited to discuss either a completed project, a work-in-progress, or a theoretical approach which aligned with one of the trends highlighted by the New Media Consortium's NMC/CoSN Horizon Report: 2017 K-12 Edition, or to consider how the confluence of interest and action (Thompson, Martinez, Clinton, & Díaz, 2017) among school-university-community collaborative partners in the digital technology in education space resulted in improved outcomes for all—where “all” is broadly conceived and consists of the primary beneficiaries (the students) as well as the providers of the educational opportunities and various subsets of the community in which the integrative endeavors are enacted. The chapters in this volume are grouped into four sections: Section 1 includes two chapters that focus on computational thinking/coding in the arts (music and visual arts); Section 2 includes three chapters that focus on the instructor in the classroom, preservice teacher preparation, and pedagogy; Section 3 includes four chapters that focus on building the academic proficiency of students; and Section 4 includes two
chapters that focus on the design and benefits of school-university-community collaboration.

Integrating Information & Communications Technologies Into the Classroom Technology has become an integral part of our everyday lives. As today’s teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but how? The Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching is a critical scholarly publication that examines the relationship between language education and technology and the ability to improve language education through technological advances. Featuring coverage on a wide range of topics, such as computer-assisted language learning, flipped instruction, and teacher education, this publication is geared toward researchers, practitioners, and education professionals seeking relevant research on the improvement of language education through the use of technology.

Integrating Information Technology into Education TEACHERS DISCOVERING COMPUTERS: INTEGRATING TECHNOLOGY IN A CHANGING WORLD, EIGHTH EDITION introduces future educators to technology and digital media in order to help them successfully teach the current generation of digital students. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Integrating Educational Technology Into Teaching

Foundations of Educational Technology

Adaptive Educational Technologies for Literacy Instruction Deryn Watson and David Tinsley The topic of the conference, integrating information technology into education, is both broad and multi-faceted. In order to help focus the papers and discussion we identified 7 themes: Current developments in society and education influencing integration; Teachers, their roles and concerns; Learners, their expectations of and behaviour in an integrated environment; Developments and concerns in the curriculum; Successes and failures in existing practice; Organisation and management of integrated environments; Identification of social and political influences. Each author was invited to focus on one theme, and these remained strands throughout as can be seen from the short papers and focus group reports. The first and most significant concern therefore was to be clear about our notions of integration; what do we mean and how is this relevant? Our keynote paper from Cornu clearly marked out this debate by examining the notion of integration and alerting us to the fact that as long as the use of IT is still added to the curriculum, then integration has not yet begun.

Meaningful Learning with Technology (Custom Edition) With digital components becoming the commonplace in the education world, educators must learn how to integrate technology into the classroom and step into the digital age of teaching. This updated, second edition resource provides teachers with classroom-tested ideas and resources to enhance instruction and help make the integration of technology a seamless process. Featuring standards-based lessons and topics such as distance learning and virtual school, webquests, blogs and social networking,
Integrating Technology into the Curriculum Note: This is the loose-leaf version of Integrating Educational Technology into Teaching and does not include access to the Enhanced Pearson eText. To order the Enhanced Pearson eText packaged with the loose-leaf version, use ISBN 0134046919. This widely popular resource balances the theory-based ‘why’ and the practical ‘how’ of using technology to support and shape the future of technology in education. In it, readers see how technology integration strategies link to specific learning theories and how teachers can plan for technology integration, complete with opportunities to practice integrating technology by designing curriculum to meet teaching and learning needs. Integrating Educational Technology into Teaching’s comprehensive technology integration framework—The Technology Integration Planning Model (TIP Model)—is built on a balance of research and proven classroom practices and shows teachers how to create an environment in which technology can effectively enhance learning. Carefully-selected examples and exercises in each chapter encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to integrate technology into content area curricula. Featured are hundreds of lesson examples and recommended resources. The Enhanced Pearson eText features embedded video, Interactive Technology Learning Checklists and exercises, author-recorded Big Ideas overviews, and additional classroom-ready example assessments. Improve mastery and retention with the Enhanced Pearson eText* The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is: Engaging. The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience. Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.* Affordable. Experience the advantages of the Enhanced Pearson eText along with all the benefits of print for 40% to 50% less than a print bound book. * The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads. *The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7" or 10" tablet, or iPad iOS 5.0 or later.

Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching Better teaching & learning through technology

Integrating Technology in Literacy Instruction This booklet includes the full text of the ISTE Standards for Students, along with the Essential Conditions, profiles and scenarios.

Integrating Educational Technology Into Teaching

Handbook of Research on Educational Technology Integration and Active Learning First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase
the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Universal Design for Learning in the Classroom "Clearly written and well organized, this book shows how to apply the principles of universal design for learning (UDL) across all subject areas and grade levels. The editors and contributors describe practical ways to develop classroom goals, assessments, materials, and methods that use UDL to meet the needs of all learners. Specific teaching ideas are presented for reading, writing, science, mathematics, history, and the arts, including detailed examples and troubleshooting tips. Particular attention is given to how UDL can inform effective, innovative uses of technology in the inclusive classroom. Subject Areas/Keywords: assessments, classrooms, content areas, curriculum design, digital media, educational technology, elementary, inclusion, instruction, learning disabilities, literacy, schools, secondary, special education, supports, teaching methods, UDL, universal design Audience: General and special educators in grades K-8, literacy specialists, school psychologists, administrators, teacher educators, and graduate students"

Epidemiology 101 As with any industry, the education sector often goes through frequent changes. It is every educator’s duty to keep up with these shifting requirements and alter their teaching style accordingly. Fostering Reflective Teaching Practice in Pre-Service Education is an essential reference source that provides a detailed analysis of the most efficient and effective ways for teachers to adapt to changes in their industry. Featuring relevant topics such as reflective teaching methodology, lifelong learning programs, pioneer service learning, and technology integration in education, this book is ideal for current educators, future teachers, academicians, students, and researchers that would like insight into the best practices for keeping up with the demanding changes in the education field.

Integrating Educational Technology into Teaching Integrating Educational Technology into Teaching, 6e, the leading Educational Technology text on the market, introduces the concept of Technology Integration, shows pre-service teachers how to plan for Technology Integration, and offers them the opportunity to practice Technology Integration when designing curriculum to support and shape learning. Integrating Educational Technology into Teaching, 6e presents a comprehensive technology integration framework built on both research and proven classroom practices. The Technology Integration Planning Model (TIP Model) shows teachers how to create an environment in which...
technology can effectively enhance learning. This sixth edition shows how to incorporate the Technological Pedagogical Content Knowledge (Tech-PACK) framework into the TIP Model. Carefully-selected examples and exercises in each chapter encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to integrate technology into content area curricula. Using hundreds of lesson examples and recommended resources, the text balances the theory-based "why" and the practical "how" of using technology to support and shape the future of technology in education. The goal of this edition is for teachers to see more clearly their role in shaping the future of technology in education. This book illustrates that great education means employing technologies to fulfill the vision they make possible: a worldwide social network and a global community that learns and grows together.

Integrating Educational Technology Into Teaching Integrating Educational Technology into Teaching, 6e presents a comprehensive technology integration framework built on both research and proven classroom practices. The Technology Integration Planning Model (TIP Model) shows teachers how to create an environment in which technology can effectively enhance learning. This sixth edition shows how to incorporate the Technological Pedagogical Content Knowledge (Tech-PACK) framework into the TIP Model. Carefully-selected examples and exercises in each chapter encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to integrate technology into content area curricula. Using hundreds of lesson examples and recommended resources, the text balances the theory-based "why" and the practical "how" of using technology to support and shape the future of technology in education.

Integrating Technology in English Language Arts Teacher Education

The book is a must read for policy makers, academics, university administrators and post graduate research students in the broad field of education and in higher education studies in particular. The book brings together a wealth of information regarding the imperatives of transformation in Africa's higher education systems. Not only do some of the chapters provide critical discussion about the conceptualisation of transformation, the majority of the chapters reflect on empirical evidence for transformation in diverse fields of mathematics, science, gender, the training of doctoral students and the governance and management of universities. This central theme of sustainable change and reform runs across the chapters of the book. For students, the book provides exemplars of practical research in higher education. For scholars in higher education and policy makers, specific issues for reform are identified and discussed.

Integrating Technology in the Classroom

Table of Contents

Preface

Chapter 1 Understanding URLs: How to Use Internet Addresses

Chapter 2 Navigating the Net: How to Move Around in Web Pages

Chapter 3 Starting Up Search Engines: How to Locate Information on the Internet

Chapter 4 Using Bookmarks or Favorites: How to Mark Web Pages for Later Use

Chapter 5 Evaluating Internet Information: How to Assess Web Site Quality

Chapter 6 Avoiding Internet Pitfalls: How to Recognize and Prevent Problems

Chapter 7 Downloading and Using Images: How to Obtain and Use Internet Graphics

Chapter 8 Downloading Programs and Plug-Ins: How to Obtain Needed Web Resources

Chapter 9 Internet Troubleshooting: How to Recognize and Address Common Errors

Chapter 10 Integrating the Internet into Teaching: Strategies, Examples, and Create-Your-Own Lesson Exercises

Chapter 11 Creating Your Own Web Site: The Basics

Chapter 12 Creating Your Own Web Site: Using Yahoo Geocities

Chapter 13 Creating Your Own Web Site: Using Netscape Composer

Appendix Answers to Exercise Questions.

Integrating Computer Technology Into the Classroom

"This book promotes state-of-the-art application of classroom technology for teaching and learning. Teachers, educational researchers, and scholars are offered some twenty chapters filled with practical applications research, practice, and thought-provoking stances on many of the key issues associated with teaching and learning in today's classroom environment"--Provided by publisher.

Integrating Educational Technology Into Teaching

+ Technology Tools for Teachers, A Microsoft Office Tutorial Package

This text addresses the changing literacies surrounding students and the need to communicate effectively using technology tools. Technology has the power to transform teaching and learning in classrooms and to promote active learning, interaction, and engagement through different tools and applications. While both technologies and research in literacy are rapidly changing and evolving, this book presents lasting frameworks for teacher candidates to effectively evaluate and implement digital tools to enhance literacy classrooms. Through the lens of Universal Design for Learning (UDL), this text prepares teacher candidates to shape learning environments that support the needs and desires of all literacy learners through the integration of technology and literacy instruction by providing a range of current models and frameworks. This approach supports a comprehensive understanding of the complex multiliteracies landscape. These models address technology integration and demonstrate how pedagogical knowledge, content knowledge, and technological knowledge can be integrated for the benefit of all learners in a range of contexts. Each chapter includes prompts for reflection and discussion to encourage readers to consider how literacy and technology...
can enable teachers to become agents of change, and the book also features Appendices with annotated resource lists of technology tools for students' varied literacy needs in our digital age.

Integrating Technology into the Curriculum 2nd Edition This package includes the Revel access card. A balance of theory, research, and classroom practice helps teachers understand the most effective ways to integrate educational technology Long recognized in the field as the leading educational technology text, Integrating Educational Technology into Teaching links technology integration strategies to specific learning theories, shows pre- and in-service teachers how to plan for technology integration, and offers opportunities to practice integrating technology by designing curriculum to meet teaching and learning needs. Carefully selected exercises, sample lessons, and recommended resources encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to infuse technology across all disciplines. The 8th Edition features updated technology integration and assessment frameworks, helping teachers employ technology in a way that revitalizes students’ interest and engagement in learning. Throughout the book, content is updated to align with the latest ISTE Standards for Educators and Students and showcases the most current tools, methods, and ideas shaping the role of technology in education. Revel™ is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience for less than the cost of a traditional textbook. NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's products exist for each title, and registrations are not transferable. In addition to the access card included in this package, you will need a course invite link, provided by your instructor, to register for and use Revel. Used books, rentals, and purchases made outside of Pearson if purchasing or renting from companies other than Pearson, the access code for Revel may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. 0134746090 / 9780134746098 Integrating Educational Technology into Teaching: Transforming Learning Across Disciplines with Revel -- Access Card Package Package consists of: 0134746384 / 9780134746388 Revel Integrating Educational Technology into Teaching -- Access Card 0134746414 / 9780134746418 Integrating Educational Technology into Teaching

Fostering Reflective Teaching Practice in Pre-Service Education Teaching and Learning with Technology Fourth edition continues to offer a foundation in learning theory and instructional design that helps position educational technology within the framework of teaching and learning. The text explores current and emerging technologies available to teachers. Using practical applications, examples from the classroom, and an array of reflection activities, the text offers students the opportunity to fully explore and apply technologies as tools to enhance teaching and learning. New Chapter 4 on diversity highlights technologies for special education students, ESL students, gifted, as well as diverse learning styles. The Fourth edition's new Chapter 14 New Technologies focuses on emerging technologies relevant to today's educators. Faculty will find a full range of in-text activities including reviews, group, critical thinking, and hands-on experiences as well as marginal references to the robust MyEducationLab website.
Integrating Digital Technology in Education This book takes a holistic approach to pedagogy and argues that the purpose of education is to educate the student's whole personality including cognitive, social, and moral domains. The four sections and twelve chapters address the current pedagogical challenges in basic and higher education in international contexts. The authors describe the principles and practices through which meaningful education is promoted and enhanced in a variety of ways. The challenges educators face in their profession as well as ways to overcome them are elaborated on both theoretically and empirically. The book allows both researchers, teachers, and educational policy makers to reflect on current developments, challenges, and areas of development in educational institutions when aiming to support student growth and learning.

Pedagogy in Basic and Higher Education As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only how? Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.

Internet Access in U.S. Public Schools and Classrooms Integrating Technology in English Language Arts Teacher Education investigates the technology practices teacher candidates in the US are being introduced to, how they are using these practices in classrooms, and how technology can be effectively integrated into English teacher education programs. By drawing upon findings from extensive longitudinal studies into teacher education programs in the US, this timely volume addresses critical themes relating to the integration of technology in education, including: Teaching with technology Technology for collaboration Technology for individualized learning and assessment By analyzing the experiences of teacher educators and candidates, and offering detailed analysis of the content, practices, and skills being taught to pre-service English teachers, Pasternak examines the entities that drive or inhibit the adoption of technology into the secondary English language arts (ELA) curriculum. This volume will resonate with an international audience of post-graduate scholars and researchers interested in the fields of teacher education, English language arts, and the relationship between technology and classroom practice.

The SAGE Encyclopedia of Educational Technology Designed for anyone interested in current educational theory and practice. Up-to-date, research-based theory and practical applications. Perfect for staff development sessions.

Sustainable Transformation in African Higher Education As an increasing number of colleges and universities call for an epidemiologic content into liberal arts programs. This title is designed to meet the needs of instructors teaching and overview or introductory course of epidemiology. In an easy-to-read and understandable format, the text demonstrates applied approaches in everyday life and also to specific health outcomes. Key Features: Numbers case studies Text boxes and vignettes throughout Exhibits Photographs Figures Illustrations Looking for

Integrating Technology Across the Curriculum

Integrating Educational Technology Into Teaching

Technology Tools for Teachers While current educational technologies have the potential to fundamentally enhance literacy education, many of these tools remain unknown to or unused by today's practitioners due to a lack of access and support. Adaptive Educational Technologies for Literacy Instruction presents actionable information to educators, administrators, and researchers about available educational technologies that provide adaptive, personalized literacy instruction to students of all ages. These accessible, comprehensive chapters, written by leading researchers who have developed systems and strategies for classrooms, introduce effective technologies for reading comprehension and writing skills.

Handbook of Research on Digital Content, Mobile Learning, and Technology Integration Models in Teacher Education As more and more universities, schools, and corporate training organizations develop technology plans to ensure technology will directly benefit learning and achievement, the demand is increasing for an all-inclusive, authoritative reference source on the infusion of technology into curriculums worldwide. The Encyclopedia of Information Technology Curriculum Integration amasses a comprehensive resource of concepts, methodologies, models, architectures, applications, enabling technologies, and best practices for integrating technology into the curriculum at all levels of education. Compiling 154 articles from over 125 of the world's leading experts on information technology, this authoritative reference strives to supply innovative research aimed at improving academic achievement, teaching and learning, and the application of technology in schools and training environments.

Handbook of Research on Innovative Pedagogies and Best Practices in Teacher Education The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning. While using innovative technology to educate individuals is certainly not a new topic, how it is approached, adapted, and used toward the services of achieving real gains in student performance is extremely pertinent. This two-volume encyclopedia explores such issues, focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices, services, and specific techniques. As technology evolves and becomes even more low-cost, easy-to-use, and more accessible, the education sector will evolve alongside it. For instance, issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia. Features: A collection of 300-350 entries are organized in A-to-Z fashion in 2 volumes available in a choice of print or electronic formats. Entries, authored by key figures in the field, conclude with cross references and further readings. A detailed index, the Reader's Guide themes, and cross references combine for search-and-browse in the electronic version. This reference encyclopedia is a reliable and precise source on educational technology and a must-have reference for all academic libraries.
Integrating Educational Technology Into Teaching Educators and those who prepare teachers are facing increased scrutiny on their practice that include pressures to demonstrate their effectiveness, meet the needs of changing demographics and students, and adapt to ever-changing learning environments. Thus, there is a need for innovative pedagogies and adoption of best practices to effectively serve the needs of digital learners. The Handbook of Research on Innovative Pedagogies and Best Practices in Teacher Education is an essential research book that takes an in-depth look at the methods by which educators are prepared to address shifting demographics and technologies in the classroom and provides strategies for focusing their curricula on diverse learning types. It takes a look at the use of innovative pedagogies and effective learning spaces in teacher education programs and the decisions behind them to enhance more inquiry learning, STEM initiatives, and prove more kinds of exploratory learning for students. Covering topics such as higher education, virtual reality, and inclusive education, this book is ideally designed for teachers, administrators, academicians, instructors, and researchers.

Integrating Educational Technology Into Teaching This guide for K-12 teachers presents a model for creating lesson plans which integrate computer technology into the curriculum. Morrison (instructional technology, Wayne State U.) and Lowther (instructional design and technology, U. of Memphis) emphasize the use of the computer as a tool for learning.

Starting Out on the Internet An engaging book for professional educators and an ideal textbook for certificate, masters, and doctoral programs in educational technology, instructional systems and learning design, Foundations of Educational Technology, Second Edition offers a fresh, interdisciplinary, problem-centered approach to the subject, helping students build extensive notes and an electronic portfolio as they navigate the text. The book addresses fundamental aspects of educational technology theory, research and practice that span various users, contexts and settings; includes a full range of engaging exercises for students that will contribute to their professional growth; and offers the following 4-step pedagogical features inspired by M. D. Merrill’s First Principles of Instruction: TELL: Primary presentations and pointers to major sources of information and resources ASK: Activities that encourage students to critique applications and share their individual interpretations SHOW: Activities that demonstrate the application of key concepts and complex skills with appropriate opportunities for learner responses DO: Activities in which learners apply key concepts and complex skills while working on practice assignments and/or projects to be created for their electronic portfolios The second edition of this textbook covers the core objectives addressed in introductory educational technology courses while adding new sections on mobile learning, MOOCs, open educational resources, "big data," and learning analytics along with suggestions to instructors and appendices on effective writing, professional associations, journal and trade magazines.

Instructional Technology in Early Childhood Teachers possess unique skills, knowledge and experience. So why should their approaches to classroom technology look the same? In Integrating Technology in the Classroom, author Boni Hamilton helps you discover technology tools and projects that resonate with your teaching style, classroom context and technology skill level while helping students achieve academic growth. In this book, every teacher can find new and immediately applicable ways to integrate technology in the classroom. Discover hundreds of tools and activities that support collaborative, student-centered learning, presented in order of complexity and difficulty to help you to build confidence and skills in each area. Explore how technology tools can support your instructional goals and help you meet the individual needs
of visual, auditory, kinesthetic and multilingual learners. Filled with the stories of teachers who have successfully employed technology in the classroom, this book will help you revise your lessons to meet the ISTE Standards for Students in a way that works for you.

Teachers Discovering Computers: Integrating Technology in a Changing World This custom edition is published for Murdoch University.

National Educational Technology Standards for Students While many facets of our lives are rapidly becoming more digital, educational institutions are now faced with the task of finding new and innovative ways to incorporate technology into the classroom. Examining the latest trends in digital tools provides a more effective learning environment for future generations. The Handbook of Research on Digital Content, Mobile Learning, and Technology Integration Models in Teacher Education is a pivotal scholarly reference source that outlines the most efficient ways for educators to employ technology-enhanced lesson plans in their classroom. Featuring pertinent topics that include blended learning environments, student engagement, artificial intelligence, and learner-centered pedagogy, this is an ideal resource for educators, aspiring teachers, and researchers that are interested in discovering recent trends and techniques related to digital learning environments and technology-enhanced classrooms.

How People Learn Key Benefit: Designed for content area methods and computers in education courses, this dual platform CD-ROM database contains approximately 500 lesson plans and strategies to integrate technology into the K-12 curriculum. The lessons are classroom tested and published examples of how others have used technology successfully in each of several major content areas and across content areas. This CD-ROM database is the only one of its kind to include classroom tested published classroom technology integration strategies--and can be used directly from the CD or copied onto a hard drive where users can edit or add to the lessons on the database. Key Topics: The summaries are provided in a format such that users can search by one or more descriptors (grade level, content area, topic technologies, relative advantage) to locate examples in a specific area of interest. Market: For computer and media center teachers of all grade levels from kindergarten through 12th grade.
