Anne-Louise is creative, sensitive and schizophrenic. But having a mental illness doesn’t mean she is unhappy. On the contrary, Anne-Louise takes pleasure in nature and human nature. Expressed in this book of poetry and prose are the thoughts and emotions of an astonishingly strong woman who has persevered through emotional and physical trauma. Interesting, touching and informative, Now, looking back, going forward might help others in understanding what it is like to live with a mental illness.
The key to success in life and business is to become a master at Conversational Intelligence. It's not about how smart you are, but how open you are to learn new and effective powerful conversational rituals that prime the brain for trust, partnership, and mutual success. Conversational Intelligence translates the wealth of new insights coming out of neuroscience from across the globe, and brings the science down to earth so people can understand and apply it in their everyday lives. Author Judith Glaser presents a framework for knowing what kind of conversations trigger the lower, more primitive brain; and what activates higher-level intelligences such as trust, integrity, empathy, and good judgment. Conversational Intelligence makes complex scientific material simple to understand and apply through a wealth of easy to use tools, examples, conversational rituals, and practices for all levels of an organization.

Memory as Prediction

Contemporary Language Motivation Theory

Engaging contemporary photography by Sally Mann, Lorna Simpson, Carrie Mae Weems, and others, Shawn Michelle Smith traces how historical moments come to be known photographically and the ways in which the past continues to inhabit, punctuate, and transform the present through the photographic medium.

Moving Forward, Looking Back

A retrospective poetry collection about life, love & death.

New Frontiers in Feminist Political Economy

This book deals with coping with life and everyday struggles. It is about giving praise for what God has done and will continue to do. This book deals with relationships, even getting over being hurt by those you love. It is inspiration that no matter where you are in life, God is actually there and He truly is concerned about you and your feelings as a child of God. God wants us to know that we are overcomers and we can always go through with the help of His divine Spirit. God has so much to offer us and we should be grateful in our hearts for all things, for they work together for the good of those who love God. This book is also about my personal expressions while I was going through changes in my life. I found inner strength from God as I wrote my feelings down and I was able to endure.

The Christena Disaster Forty-two Years Later—looking Backward,
Looking Back, Looking Forward

This book, the first full critical overview of the film avant-garde, ushers in a new approach—and in the process creates its own subject. While many books have studied particular aspects of the European film avant-garde of the 1920s and 1930s, Moving Forward, Looking Back provides a much-needed summary of the theory and practice of the movement, while also emphasizing aspects of the period that have been overlooked. Arguing that a European perspective is the only way to understand the transnational movement, the book also pioneers a new approach to the alternative cinema network that sustained the avant-garde, paying particular attention to the emergence of film culture as visible in screening clubs, film festivals, and archives. It will be essential to anyone interested in the influential movement and the film culture it created.

Self-Study Research Methodologies for Teacher Educators

This volume brings together the work of outstanding feminist scholars who reflect on the achievements of feminist political economy and the challenges it faces in the 21st century. The volume develops further some key areas of research in feminist political economy—understanding economies as gendered structures and economic crises as crises in social reproduction, as well as in finance and production; assessing economic policies through the lens of feminist political economy.

Looking Back, Looking Forward

Theoretical reflections on memory and prediction, linking these concepts to the role of the cerebellum in higher cognition. What is memory? What is memory for? Where is memory in the brain? Although memory is probably the most studied function in cognition, these fundamental questions remain challenging. We can try to answer the question of memory's purpose by defining the function of memory as remembering the past. And yet this definition is not consistent with the many errors that characterize our memory, or with the phylogenetic and ontogenetic origin of memory. In this book, Tomaso Vecchi and Daniele Gatti argue that the purpose of memory is not to remember the past but to predict the future. Vecchi and Gatti link memory and prediction to the role of the cerebellum in higher cognition, relying on recent empirical data to support theoretical reflections. They propose a new model of memory functions that comprises a system devoted to prediction, based in the cerebellum and mediated by the hippocampus, and a parallel system with a major role for cortical structures and mediated by the amygdala. Although memory is often conceived as a kind of storehouse, this storehouse is constantly changing, integrating new information in a continual process of modification. In order to explain these characteristics, Vecchi and Gatti argue, we must change our interpretation of the nature and functions of the memory system.
Looking Back, Looking Forward

This book brings together contributions from the leaders of the language learning motivation field. The varied chapters demonstrate how Gardner's work remains integral to a diverse range of contemporary theoretical issues underlying the psychology of language, even today, 60 years after the publication of Gardner and Lambert's seminal 1959 paper. The chapters cover a wide selection of topics related to applied linguistics, second language acquisition, social psychology, sociology, methodology and historical issues. The book advances thinking on cutting-edge topics in these diverse areas, providing a wealth of information for both students and established scholars that show the continuing and future importance of Gardner and Lambert's ideas.

Sociocultural Theories of Learning and Motivation

The rich history of Valparaiso spans centuries. Originally home to the Potawatomi Indians, the area was a centralized meeting place for many Native American tribes. The land was sold to the U.S. in 1832, and in 1836, Porter County was formed when the area was separated from LaPorte County. The new county was named in honor of Comdr. David Porter, who played a significant role in the War of 1812 at the Battle of Valparaiso, Chile. The county seat was named Portersville. In 1837, Portersville was proudly renamed Valparaiso, which literally means "vale of paradise," to further honor Commodore Porter. In Valparaiso, Indiana: Looking Back, Moving Forward author Lanette Mullins chronicles the history and development of the city, with its small-town charm, in over 200 vintage images. The book features photographs of the historic homes that grace the city streets, the famous individuals who walked them, the influential history of Valparaiso University, and the cultural institutions throughout the city.

Moving Forward, Looking Back: Trains, Literature, and the Arts in the River Plate

"From the early days of the riverboat and train routes through to the modern-day cityscape, Valparaiso has been a hub for transportation and cultural exchange. The area's rich history and diverse population have contributed to its unique character and influence on the surrounding region."

by Sarah M. Misemer argues that the train is paradoxically an anachronistic and modern indicator of River Plate national identity when seen in the literature and film of the region. The train's connections with new concepts of time and space, as well as the rise of the industrial age, make it a symbol loaded with cultural meanings. This project traces the importance of the train as a market of key moments in Argentine and Uruguayan history from 1854 to the present (nation-building, neo-colonialism, modernization/industrilization, dictatorship, privatization, and debt crisis). Through textual, filmic, and historical accounts this study demonstrates that the train is not simply an icon of the nineteenth-century's Naturalist movement, but rather a powerful contemporary metaphor for authors and directors of the River Plate as they communicate/create collective memory and cultural values in a region mired in uneven spurts of modernization and progress. Many critical shifts in concepts of time and society's consciousness of modernity were derived from the railway and World Standard Time in the nineteenth century. These innovations restructred the way people viewed the world and dealt with "public" and "private" time. The forward, projectile motion along a linear track mimicked the passage of public chronological time. Conversely, the train also invoked a private, nostalgic view of tim as the traveler was yanked from his/her traditional view of the space/time continuum via the train's velocity. Travelers observed the landscape "disappear" in their backward glance from the window—although the landscape and interior compartment's space remained stagnant. This optical illusion caused passengers to perceive the world in new ways. Thus, the train unveils a conflictive blend of nostalgia and progress in the River Plate, as these countries move forward, but look back. Celebrated authors such as Jorge Luis Borges, Alfonsina Storni, Armonia Somers, Juan Carlos Onetti, Roberto Cossa, Eduardo Rovner, and Felisberto Hernandez, all feature the train prominently in their work and are included here. The previous lacuna in academic criticism on this topic is puzzling considering the persistence of authors in Argentina and Uruguay who continue to focus on the train. Misemer's work offers a beginning study of the underrepresented field of railway literature and film in the Hispanic world by some of the most influential authors and cinematographers of their time. Each chapter reveals how rail systems denote watershed moments in the region's development, and shows how these are transformed and transfixed in the River Plate's population's memories through fictional and visual renderings. This book is offered as a first step in acquainting rail aficionados and lovers of literature with the literary terrain of the Southern Cone through a multi-genre approach.

Looking back, moving forward

Catastrophes are on the rise due to climate change, as is their toll in terms of lives and livelihoods as world populations rise and people settle into hazardous places. While disaster response and management are traditionally seen as the domain of the natural and technical sciences, awareness of the importance and role of cultural adaptation is essential. This book catalogues a wide and diverse range of case studies of such disasters and human responses. This serves as inspiration for building culturally sensitive adaptations to present and future calamities, to mitigate their impact, and facilitate recoveries.

To succeed in the face of disruptive competition, companies will need to harness the power of a wide range of partners who can bring different skills, experience, capacity, and their own networks to the task. With the advent of new technologies, rapidly changing customer needs, and emerging competitors, companies across more and more industries are seeing their time-honored ways of making money under threat. In this book, Arnoud De Meyer and Peter J. Williamson explain how business can meet these challenges by building a large

and dynamic ecosystem of partners that reinforce, strengthen, and encourage innovation in the face of ongoing disruption. While traditional companies know how to assemble and manage supply chains, leading the development of a vibrant ecosystem requires a different set of capabilities. Ecosystem Edge illustrates how executives need to leave notions of command and control behind in favor of strategies that will attract partners, stimulate learning, and promote the overall health of the network. To understand the practical steps executives can take to achieve this, the authors focus on eight core examples that cross industries and continents: Alibaba Group, Amazon.com, ARM, athenahealth, Dassault Systèmes S.E., The Guardian, Rolls-Royce, and Thomson Reuters. By following the principles outlined in this book, leaders can learn how to unlock rapid innovation, tap into new and original sources of value, and practice organizational flexibility. As a result, companies can gain the ecosystem edge, a key advantage in responding to the challenges of disruption that business sees all around it today.

A wide-ranging exploration of the past, present, and future effects of women's ordination on the church

Edited by a well-respected theologian and featuring a diversity of voices from across the Anglican Communion

This book gauges the impact and implications of women's ordination on today and tomorrow. What has it women's ordination meant for the church? For preaching? For pastoral care? For the episcopate? For lay women and for women across the Anglican Communion? The editor draws upon a rich variety of writers and thinkers for this new book.

Recognizes the progress of the past two decades in the response to sexual assault cases by law enforcement agents, prosecutors and emergency medical care providers. Speaks to the development of rape crisis centers and other victim services that concentrate on meeting the needs of the victim. Centers on the belief that the system that addresses sexual assault in the community must be victim-centered -- expanding the role of the victim from that of an important witness to an active participant in case-related decision making. The untold history of lesbian life from those who have lived it! Lives of Lesbian Elders: Looking Back, Looking Forward illuminates the hopes, fears, issues, and concerns of gay women as they grow older. Based on interviews with 62 lesbians ranging in age from 55 to 95, this very special book provides a historical account of the shared experiences of the lesbian community that is so often invisible or ignored in contemporary society. The book gives voice to their thoughts and feelings on a wide range of issues, including coming out, identity and the meaning of life, the role of family and personal relationships, work and retirement, adversity, and individual sources of strength and resilience. Cast off and overlooked at best or victims of scorn and prejudice at worst, lesbians in the twentieth century lived dual lives, their full voices unheard—until now. Lives of Lesbian Elders chronicles the life choices they made and their reasons for making them, set against the contexts of culture, politics, and the social mores of the eras in which they lived. Their stories of courage, resilience, resourcefulness, pride,

...round and independence help restore lesbian history that has been forgotten, distorted, or disregarded and provide the information necessary to meet the future needs of aging lesbians. Lives of Lesbian Elders gives aging lesbians a chance to discuss their thoughts on a variety of topics, including:

- Coming out: "You didn't talk about it . . . Until two years ago, I never even referred to a lesbian or would I allow the word to pass my lips"
- Identity: "The only difference between me and anybody else is that I just happen to be sleeping with a woman"
- Family: "I feel very connected with the lesbian community here . . . I guess I would call that family"
- Work: "I was going to become a youth minister at one point and it dawned on me in high school that there was no way the church was going to let me work with kids"
- Aging and the Future: "I think financing, of course, is a real big problem for lesbian women"

...and much more! Lives of Lesbian Elders: Looking Back, Looking Forward also includes appendices that present demographic data on the women who were interviewed for the book, information on historical timelines, and suggested readings on lesbian history. The book is an invaluable addition to the growing collective history of lesbians in the United States.

Ecosystem Edge

It is now nearly thirty years since sociocultural theories of learning created great
excitement and debate amongst those concerned with learning in diverse
contexts. Since that time significant advances have been made in sociocultural
theory and research. Various sociocultural approaches to the understanding of
learning (for example, sociocultural psychology, sociocultural discourse, cultural
historical activity theory) have been developed and consolidated and new
challenges are currently being addressed. In the motivational arena sociocultural
approaches deriving from Vygotsky have only begun to emerge relatively
recently. In this Volume we examine and evaluate the achievements of past
sociocultural theory and research, and consider the future directions of
sociocultural theory and research in the domains of learning and motivation.

Going Forward by Looking Back

You can deal with an issue all your life, but until you choose to move on with a
positive attitude, you will remain stuck in your past. There’s power in a single
positive thought. Therein lies the flashlight to shine your path to recovery, which
reveals that you hold the power to your mind because it’s you who feeds it, and
you hold the switch to a brighter day. So turn it on. My experience in moving
forward in life began with me looking back and understanding the hurts of life I
went through, which led me to discover the power of forgiveness. And when I did,
I made the decision to forgive and understand that everything happens for a
reason—it could be a life lesson. Your future has a lot to do with your past. You
might not have had the chance to determine your past, but you have a choice to
turn your life around, as well as the lives of the people around you. So choose to
use it wisely, and so it matters with what attitude you are reflecting on your past.

I give you two options: (1) the positive or (2) the positive.

Looking Back, Moving Forward

On a sunny afternoon in August of 1970, the Eastern Caribbean was, without warning, confronted with a terrible and tragic event. The Christena, a well-used ferry that regularly crossed the eleven-mile expanse between the twin islands of St. Kitts and Nevis sank. The two British colonial societies were suddenly thrown into turmoil, finding themselves unprepared to deal with such sudden tragedy. The ferry was registered to carry 155 passengers, but it was severely overloaded. While ninety-nine people survived that afternoon, nearly 250 other passengers perished disaster. As if their struggle to heal after the tragedy was not taxing enough, the islands had yet more adversity to conquer. However, both societies were determined to overcome that terrible event, even as they fought to achieve greater political independence. Told from the perspective of Whitman T. Browne, PhD, a native of Nevis, who lived on the island at the time of the tragedy. "The Christena Disaster Forty-Two Years Later" is a moving, firsthand account of how these sister communities banded together, not only to win their political autonomy, but also to overcome their emotional suffering as a result of greater tragedy.

Lives of Lesbian Elders

In Cultures, Citizenship and Human Rights the combined analytical efforts of the fields of human rights law, conflict studies, anthropology, history, media studies, gender studies, and critical race and postcolonial studies raise a comprehensive understanding of the discursive and visual mediation of migration and manifestations of belonging and citizenship. More insight into the convergence—but also the tensions—between the cultural and the legal foundations of citizenship, has proven to be vital to the understanding of societies past and present, especially to assess processes of inclusion and exclusion. Citizenship is more than a collection of rights and privileges held by the individual members of a state but involves cultural and historical interpretations, legal contestation and regulation, as well as an active engagement with national, regional, and local state and other institutions about the boundaries of those (implicitly gendered and raced) rights and privileges. Highlighting and assessing the transformations of what citizenship entails today is crucially important to the future of Europe, which both as an idea and as a practical project faces challenges that range from the crisis of legitimacy to the problems posed by mass migration. Many of the issues addressed in this book, however, also play out in other parts of the world, as several of the chapters reflect. This report explores the state of nutrition in Odisha, assesses how nutrition outcomes changed in the state, and more importantly, and examines the road that lies ahead of Odisha on the journey to support better nutrition for the state.

Nutrition progress in Odisha: Odisha has made more rapid progress in reducing child undernutrition than many other richer states. Particularly between 2006 and 2016, nutrition and health outcomes improved significantly in the state. The prevalence of stunting declined from 45 percent to 34.1 percent, although there...
A marginal increase in wasting from 19.6 to 20.4 percent and in severe wasting from 5.2 to 6.4 percent. In 2018, a further decline was noted in the prevalence of stunting (28.9 percent) and wasting (12.9 percent). Although anemia among women of reproductive age declined by 10 percentage points between 2006 and 2016, it is still high, with over half the women in the state suffering from anemia. Exclusive breastfeeding for children under 6 months of age is an area of progress, improving from 50.8 percent in 2006 to 65.6 percent in 2016; the prevalence of low birth weight, however, remained nearly unchanged during this period (Kohli et al. 2017). Emerging nutritional challenges, such as noncommunicable diseases, are likely to create new challenges in coming years.

Looking Forward, Looking Back: Interactive Digital Storytelling and Hybrid Art Approaches

The trauma of losing a sibling when we are in our adult years is one of the most unrecognized and undertreated areas of psychology. There is no other loss in adult life that appears to be so neglected as the death of a brother or sister, says bereavement specialist and psychologist, Therese Rando. And Rando is just one expert author Berman interviews in this moving book about loss. We see here how, when an adult dies, the parents, spouse, and children of that person become the focus, but brothers and sisters most often fall to the sidelines and are left to find a way to deal with the grief and recover alone. Yet, when a brother or sister dies, we lose our longest lifetime companion, someone with whom we have shared an intimate family history. And, in most cases, that was someone for whom we had conflicted feelings: shared identity yet competitive feelings, pride yet jealousy, love yet hate. Most of us come to make peace with the relationship at some point. How to make peace with the death of the sibling - which can conjure up a well of feelings, from wishing you were closer to wanting to change some past events you shared - can haunt an adult. But author Claire Berman, who lost her own sister to heart disease in the week of September 11, 2001, when America lost its innocence, takes us into the emotional world of sibling loss, showing us how to understand and navigate the aftermath of a loss that can leave adults feeling angry, confused, guilty, empty, or just like Berman, wanting to hit that speed dial button still marked with her sister's name.
