The Secret History of the Roman Roads of Britain

This revised edition of the classic text of the period provides both the student and the specialist with an informative account of post-Roman English society. After a general survey of the main developments from the fourth century to the eleventh, the book offers analysis of: • the changing character of kingship, of royal government and the influence of the church • the history of settlement • the making of the landscape • the growth of towns and trade • the consequences of the Norman conquest. The author also considers the various influences - British, Frankish, Viking and Christian that helped shape English society and contributed to the making of a united kingdom.

The Secret History of the Roman Roads of Britain

This insightful survey of the "things" of medieval Europe allows modern readers to understand what they looked like, what they were made of, how they were created, and how they were used. It provides information on a comprehensive range of topics from agriculture to zoo, and also includes books, castles, mines, clothing and universities • Provides bibliographic lists of suggested readings following each entry, with a full bibliography at the end • Appropriate for both high school and lower-level undergraduate students

A handbook for travellers in Wiltshire, Dorsetshire and Somersetshire

It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social, cultural, and historical circumstances - archaeology is always carried out in the present. More recently, however, many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself: how we might undertake archaeologies of, as well as in the present. This book is the first comprehensive survey of an exciting and rapidly expanding sub-field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past. It is an attempt to develop a tool-kit of concepts and methods which are applicable to this new field, and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods, and case studies from diverse contexts in different parts of the world, which have not previously been considered collectively.

Nelson's Perpetual Loose-leaf Encyclopaedia

There have been many books on Britain's Roman roads, but none have considered in any depth their long-term strategic impact. Mike Bishop shows how the road network was vital not only in the Roman strategy of conquest and occupation, but influenced the course of British military history during subsequent ages. The author starts with the pre-Roman origins of the network (many Roman roads being built over prehistoric routes) before describing how the Roman army built, developed, maintained and used it. Then, uniquely, he moves on to the post-Roman history of the roads. He shows how they were crucial to medieval military history (try to find a medieval battle that is not fought near a Roman road) and traverse the Roman roads and even in the development of the modern road network. How have some parts of the network remained in use throughout? This text is supported with clear maps and photographs of the network. Much of the content on Roman roads are concerned with cataloguing or tracing them, or just dealing with aspects like surveying. This one makes them part of military landscape archaeology.

England & Wales delineated, by T. Dugdale, assisted by W. Burnett. (Curiosities of Great Britain).

This book looks at an almost totally neglected aspect of medieval England and Wales. Starting from the basic concept of a ‘road’ in medieval times, it looks at how well the Roman roads had survived and then asked: Why did they fail? What records of their travels did they leave? What archaeological evidence remains? Dr Kindie answers these questions and examines the unique cartographic evidence. About the author: Dr Paul Kindie took early retirement in 2000, he was previously a Senior Lecturer in Geography. He is Honorary Secretary of Manchester Geographical Society. He has written widely on roads, maps and the Lake District

Old Oswestry Hillfort and its Landscape: Ancient Past, Uncertain Future

Roman Roads in Britain

This textbook supports the specification for AS and A-Level Ancient History (first teaching September 2017). It covers the whole of Component 2, both the compulsory Period Study and the three optional Depth Studies: Period Study: The Julio-Claudian Emperors, 31 BC–AD 69 by Robert Ross and James Harrison Depth Study: The Breakdown of the Late Republic, 89–31 BC by Steve Matthews Depth Study: The Flavians, AD 68–96 by Robert Ross and James Harrison Depth Study: Ruling Roman Britain, AD 43–c.128 by James Harrison

What is life like in Roman Britain? These are the sort of questions that you are required to consider for A-Level Ancient History. This textbook guides you through the use of power and politics in the Roman Senate and Imperial court from the late Republic into the Principate. It considers individual ambition against the need for change, and substantive action against image and deception. The ideal preparation for the final examinations, all content is presented by experts and experienced teachers in a clear and accessible narrative. Ancient literary and visual sources are described and analysed, with supporting images. Helpfull student features include study questions, further reading, and boxes focusing in on key people, events and terms. Practice questions and exam guidance prepare students for assessment. Archaeology Hotspot Great Britain

In The Story of England Michael Wood tells the extraordinary story of one English community over fifteen centuries, from the moment that the Roman Emperor Honorius sent his legions to the English coast in the fifth century, to advising the English to look to their own defenses to the village as it is today. The village of Kilworth in Leicestershire lies at the very centre of England. It has a church, a pub, the Grand Union Canal, a First World War Memorial—and many centuries of recorded history. In the thirteenth century the village was bought by William de Worton, who later endowed Worton College, Oxford, with the result that documents covering 750 years of village history are lodged at the college. Building on this unique archive, and enlisting the help of the current inhabitants of Kilworth, with a village-wide archeological dig, with the first complete DNA profile of an English village and with use of local materials like family memorials, the story of Kilworth is the story of England itself, a ‘Who Do You Think You Are?’ for the entire nation. The better than historian for decades, ‘In Search of England’ Wood brings home not just the ways in which buildings, landscapes and written texts may be read, but the sensual beauty of encounters with them. TEL Michael Wood was born and educated in Manchester. He was an open scholar in Manchester University, where he was a Woodhouse Fellow and Lecturer in Medieval History and Art History. He has won a number of internationally successful tv series, including In the Footsteps of Alexander the Great, and four of his books have been UK non-fiction number one bestsellers. His highly acclaimed book of essays on early British history, In Search of England, was published by Penguin in 1999.

The Romano-British Villas at Castle Copse, Great Bedwyn

Nelson’s Perpetual Loose-leaf Encyclopaedia

A Topographical Dictionary of Great Britain and Ireland

These efforts have shed light not only on the history of the villas itself, but also on the shifting focus of power over the course of a millennium at the sites associated with Castle Copse in the immediate region - the Iron Age hillfort of Chisbury, a post-Roman settlement, and a Saxon village destined to become an urban center.

Gazetteer of the British Isles

For over 25 years The Handbook of British Archaeology has been the foremost guide to archaeological methods, artefacts and monuments, providing clear explanations of all aspects of archaeology used by archaeologists. This completely revised and updated edition is highly regarded by archaeologists. It provides a comprehensive overview of the many areas of studies, including the development and current theories and methods are covered. The growing interest in post-medieval and industrial archaeology is fully explored in a brand new section dealing with these crucial periods. Hundreds of new illustrations enable instant comparison and identification of objects and monuments – from Palaeolithic handaxes to post-medieval gravestones. Several maps pinpoint the key sites, and other features include an extensive bibliography and a detailed index. The Handbook of British Archaeology is the most comprehensive resource book available and is essential for anyone with an interest in the subject – from field archaeologists and academics to students, heritage professionals and Time Team followers and amateur enthusiasts.

Medieval Roads and Tracks

A fascinating review of archaeological Great Britain, covering the deep archaeology of this long-settled island—from early hominid remains through the modern world—as well as Great Britain’s role in the larger archaeological realm.

All Things Medieval: An Encyclopedia of the Medieval World [2 volumes]

There have been many books on Britain’s Roman roads, but none have considered in any depth their long-term strategic impact. Mike Bishop shows how the road network was vital not only in the Roman strategy of conquest and occupation, but influenced the course of British military history during subsequent ages. ??The author starts with the pro-Roman origins of the network (many Roman roads being built over prehistoric routes) before describing how the Roman army built, developed, maintained and used it. He then moves on to the post-Roman period, and the impact road construction had on society and economy, and concludes with a look at the role of Roman roads in Britain in the modern world. He shows how the network was crucial to medieval military history (try to find a medieval battle that is not near one) and the governance of the realm, fixing the itinerary of the royal progresses. Their legacy is still clear in the building of 18th century military roads and even in the development of the modern road network. Why have some parts of the network remained in use throughout??The text is supported with clear maps and photographs. ??Most books on Roman roads are concerned with cataloguing or tracing them, or just dealing with aspects like surveying. This one makes them part of the military landscape archaeology.

Wanderings of an Antiquary

The Material Culture of the Built Environment in the Anglo-Saxon World

This book, organised into 14 well-crafted chapters, charts the archaeology, folklore, heritage and landscape development of one of England’s most enigmatic monuments, Old Oswestry Hillfort, from the Iron Age, through its inclusion as part of an early medieval boundary between England and Wales, to its role during World War I.

Most places in Britain have had a local history written about them. Up until this century these histories have addressed more parochial issues, such as the life of the manor, rather than explaining the features and changes in the landscape in a factual manner. Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes, and can be interpreted through fieldwork as well as from old maps and documents. Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside, illustrating his points with aerial photographs, maps, plans and charts. He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved.
